

More Efficient Packaging Made Simple
Storopack Presents Innovative Solutions for Optimal Packaging
Processes in Intralogistics at LogiMAT 2023

Storopack at LogiMAT
2023

Metzingen, February 2023. In keeping with the trade fair motto “hands-on innovation,” visitors to LogiMAT 2023 in Stuttgart can look forward to exciting new products from Storopack. The Metzingen-based protective packaging specialist will be unveiling innovative solutions to make the packaging logistics process significantly more efficient over the final 100 meters and to boost productivity – from manual or automated packaging through to the processing of filled parcels. Visitors to the trade fair will find Storopack in Hall 2, Stand 2D20 from April 25 to 27.

Automatically Optimized

At the international trade fair for intralogistics solutions and process management, Storopack is focusing on two topics: automated packaging and further processing as well as manual packaging with semiautomated further processing. Visitors will experience how shipping boxes can be filled fully automatically with the optimum amount of packaging material – such as robust PAPERplus® paper cushioning – and then sealed with adhesive tape. At its stand, Storopack will also be demonstrating how manual packaging processes can be optimized, with air pillow systems providing AIRplus® air cushions quickly and conveniently. The finished package is then prepared for dispatch using a semiautomated carton sealer. Storopack will be showcasing how these processes work in detail, as well as the productivity benefits, at its trade fair stand.

Tailored Solutions

On request, interested visitors to the stand can also find out more about the company’s product portfolio and about solutions for various industries. As a global family-owned company, Storopack boasts extensive expertise in customized protective packaging, technical molded parts, and the optimal packaging logistics process. Another advantage: with Storopack, customers buy directly from the manufacturer.

At LogiMAT 2023, Metzingen-based protective packaging specialist Storopack will be presenting innovative solutions that make the packaging logistics process far more efficient and boost productivity – both in manual and automated packaging. **Image: Storopack**
